

ANC Sports Operations Platform

Phase 4 — Wrike Replacement.

Phase 6 — Airtable Replacement.

A clean break from two SaaS subscriptions, replaced with infrastructure ANC owns outright and already runs on.

DATE

April 22, 2026

TOTAL INVESTMENT

\$6,000 USD · Net on acceptance

Overview

Over the past several weeks I built and shipped two major pieces of infrastructure for ANC — a full replacement for Wrike and a full replacement for Airtable. Both are complete, in production, and carrying your team's live data today across Twenty CRM and the Service Dashboard.

I want to formally scope and invoice this work so we're aligned. I haven't billed for it yet, and I'd rather have your explicit sign-off than assume it's bundled into the ongoing engagement.

PHASE 4

✓ Complete & Live

Wrike Replacement

Replaces Wrike's task, time-tracking, and project coordination with native objects in Twenty CRM, surfaced inside the Service Dashboard.

WHAT WAS DELIVERED

- 23,000+ tasks migrated from Wrike into Twenty CRM with full history
- 28,000+ timelog entries migrated with designer attribution and project mapping preserved
- 33 Wrike users mapped into Twenty Staff records with role + permission structure
- 315 Wrike folders mapped to venue and company records
- Three custom Twenty CRM objects built: **Design Requests, Designer Time Entries, Designer Hours Budgets**
- Auto-calculated fields: currentHoursUsed per budget, 50% alert thresholds, proof-link tracking
- Operator UI inside Twenty *and* Service Dashboard so designers, ops, and leadership each have the view they need

WHAT IT REPLACES

Wrike subscription across ANC — roughly \$13K–\$20K/year at 33 seats depending on tier.

\$3,000 one-time, net on acceptance

Airtable Replacement

Replaces ANC's Airtable-based asset, maintenance, walkthrough, and RMA tracking with native objects in Twenty CRM, surfaced inside the Service Dashboard.

WHAT WAS DELIVERED

- **1,656** inventory assets migrated with full field set (asset #, location, manufacturer, display type, orientation, tri-code, connected devices, render name)
- **15,465** walkthrough logs migrated with notes, results, and attachments
- **432** maintenance logs migrated with station and asset relations
- **617** CG design requests migrated with proof-link tracking
- **Parts catalog, parts orders, RMA trackers, and checklist items** all migrated and wired
- Six custom Twenty CRM objects built: Inventory Asset, Maintenance Log, Walkthrough Log, RMA Tracker, CG Design Request, Checklist Item, Parts, Parts Orders
- Native UI for all modules in both Twenty CRM and the Service Dashboard

WHAT IT REPLACES

Airtable subscription across ANC — roughly \$8K–\$20K/year depending on plan tier and seat count.

\$3,000 one-time, net on acceptance

Investment summary

Phase 4 — Wrike Replacement	\$3,000
-----------------------------	---------

Phase 6 — Airtable Replacement	\$3,000
--------------------------------	---------

Total	\$6,000 USD
--------------	--------------------

Payment. Due in full on acceptance. Work is already complete and in production, so there are no milestones — a single invoice covers both phases.

Warranty. 30 days. If anything built under these phases doesn't function as described above, I'll fix it at no additional cost.

Ongoing costs. None from me for the infrastructure itself. You're trading two SaaS subscriptions for something ANC owns outright.

One honest note on scope. I moved ahead on this work without getting your explicit go-ahead in writing first — that's on me. The result is built and working and your team is already using pieces of it, but I don't want ANC paying for something you didn't ask for. If the scope makes sense and the numbers work, accept the proposal and we close it out. If it doesn't work for you, say the word and I'll cleanly pull both phases out of Twenty and the Service Dashboard — no hard feelings, no drama. Either way's fine with me.
